I have a 5000 head and 210xl, 2.5xl and 115xl cabs. The 210xl isn't a great cab on its own, it's better paired with a cab that has more low end. And the 5000 head is designed to be used with at least two cabs. You'd find a 115xl cab would work GREAT with the amp and cab you have.

I switched out my GT 12AX7 in my Hartke 5000 and put in an EHX12AX7 and I thought I got more punch out of it and it cleaned it up a little bit but the GT I had in there was from around 94 from what the previous owner had told me and the first year I had the Hartke I beat the crap out of it before I put it in a rack so it might have gotten loose.
