Draining Engine Oil This is the process where a plug is removed that the oil drains out the bottom. Extracting Engine Oil This is where a device is used to suck the oil out. For this discussion, let's assume we are pulling oil out through the dip stick funnel. When most folks think of an oil change, they think of draining the oil.

If you have the 1.8t A4 your maf should be more to the left side of the engine bay next to your air intake, as opposed to the right side on a VW 1.8t. If I see my neighbor outside I'll take a look at his car for an exact location. Try removing any of those plastic covers near the air box and it should be in that vicinity.. daniel on June 12, 2011:
